**Category:** AI music, speech synthesis and voice-to-voice

Google Arts & Culture is a fantastic source of teaching materials. It is an online collection of:

- > High-resolution images of works of art exhibited in various museums around the world,
- > Photos of historical events and personalities
- > 360° videos and virtual gallery tours,

You can also download lesson plans on various topics, try out creative experiments, play to test skills on art and find materials related to specific themes.

The following are available:

- > Ready-to-use resources
- > Downloadable lessons
- > Apply digital skills lessons
- > Customisable activities

A particular area allows pupils to be directly involved in experimenting with various activities in which they can be directly involved, such as composing as Beethoven, Bach, and Mozart and creating melodies with artificial intelligence, or interacting with art through the artistic coloring book or the collaborative puzzle party.

A guide for educators to using Google Arts & Culture in the classroom is now available, to make learning more engaging and motivating:
